 THAILAND  
 Kasikornbank Headquarters III

**KASIKORNBANK HEADQUARTERS III**  
 Chaeng-Watthana, Thailand

**Green Building**

The Kasikornbank Headquarters III is a prime example of a green building. It features a variety of sustainable design elements, including a green wall, a rainwater harvesting system, and a solar water heating system. The building is also designed to be energy-efficient, with a high level of insulation and a low level of embodied energy. The building is a testament to the power of green design and the importance of sustainable architecture.

**Green Design Award**  
**WINNER**
